

UNIVERSITY of NEBRASKA—LINCOLN

N *31st Annual* **BULL SALE**

“Bulls Worth Waiting For”

SATURDAY, APRIL 13TH, 2024

LUNCH AND VIEWING AT 11:00 AM | AUCTION STARTS AT 1:00 PM

UNL ANIMAL SCIENCE COMPLEX

Schedule of events:

Saturday, April 13th, 2024

at the Animal Science Complex

11:00 a.m lunch and bull viewing in the arena

1:00 p.m auction begins in room B101

For more information, contact:

Dr. Matt Spangler, Teaching Herd Coordinator

A218h Animal Science

University of Nebraska- Lincoln

Lincoln, NE 68583- 0908

Days: 402-472-6489

Sale day phone:

Matt Spangler: 402-947-1668

Austin Holliday: 402-300 0338

To inspect bulls before sale, call:

Austin Holliday (402-300-0338)

Cow Unit Manager at Mead, NE

*Bulls can be viewed at ENREEC, Mead NE, before sale day

*Pickup and delivery details can also be organized by calling Austin Holliday

Directions to bull corral for viewing prior to sale day:

From Mead

5 miles south on County Road 10 to H street

1/2 mile back East

From Lincoln

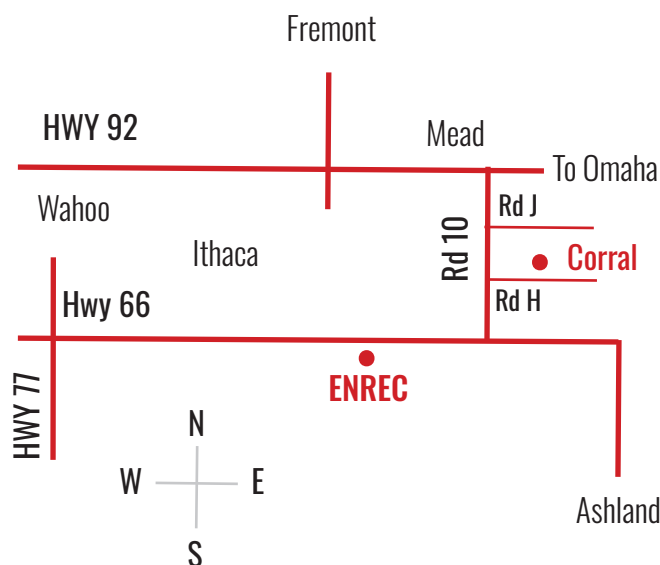

18 miles North on Hwy 77 to Hwy 66 junction 7 miles East to County Road 10

North 1 mile to 10th and H Street

1/2 mile East

Sale order including scrotal circumference will be posted on sale day

All bulls are started with a base bid of \$2,300

DVAuction
Broadcasting Real-Time Auctions

Watch and Bid Online at DVAuction.com

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DVAuction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Creat New Account" tab
- Enter a user name, password and your contact information.
- Complete the Banking Information. (If you are only interested in viewing you can skip this section)
- Select your Time Zone, Accept the Terms and Conditions and click "Create Account"
- Complete the process by answering a few questions, selecting your subscription choices
- Click on "Apply for Bidding" in the upper left corner of your screen to select the sales you wish to bid on
- Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
- If you would prefer to be approved using your credit card, call (402) 316-5460.
- Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Welcome

TO THE ANNUAL UNL BULL SALE

Dear Cattlemen:

I would like to welcome you to the 31st annual Bull Sale conducted by the 2024 UNL Beef Cattle Merchandising class. This sale is the culmination of many hard hours devoted by the Merchandising class and I hope you will take the time to visit with them on sale day. As always, our job is to produce a unique learning environment for students and commercial bulls that will work for you.

The bulls will be brought to campus on the Friday before our sale and will be available to view in the arena of the Animal Science building the morning before the sale. The bull sale will be conducted in room B101 of the Animal Science building. I encourage you to visit with me prior to our sale should you have any questions and please contact Austin Holliday to view our bulls at our Bull Development Unit prior to the sale.

I think about genetic selection tools a lot, and I realize that some reading this might not. With that in mind, we encourage you to reach out, before the sale or on sale day, to tell us about your goals so that we can help make sure that we best match bulls to your operation. My job, year-round, is to develop, evaluate, and deploy advanced genetic selection tools and methods. That is why you will notice that our catalog focuses on the (proven) selection tools that really matter—EPDs and economic selection indexes. If there is additional data that you would like to see to help you make your decision, please ask and we'll provide it.

This sale requires a great deal of effort year-round by numerous people. We would like to thank our ENREEC Cow-Calf crew: Austin Holliday, Manager; Bonnie Long, Brooke Rudloff, and Dale Foster along with all the student employees. Also, thanks to the ENREEC Feedlot crew. We certainly could not have put this together without Brent Johnson. We owe a lot to those that put more effort into our sale than they need to, specifically our auctioneer Matt Printz and Chris Beutler. We would also like to thank all of the folks at DvAuction.

Most of all, we thank you for your support of our sale and our teaching program here at UNL.

Sincerely,

Matt Spangler
UNL Teaching Herd Coordinator Professor
& Extension Beef Genetics Specialist

The Class

MEET THE 2024 BULL MERCHANDISING CLASS

Chaylee Tonniges Gresham, NE

Major: Animal Science- Business Communication

Minors: Krutsinger Nebraska Beef Industry Scholars and Engler Entrepreneurship

I grew up on a diversified ag operation running cow calf pairs, backgrounding calves, and farming row crop. I am the fourth generation cattlemen and have a passion for cattle production and advocating for the industry. Following graduation I plan on starting a career in cattle sales.

McKenna Carr Ankeny, IA

Major: Animal Science- Food Animal Production and Management

Minor: Ag Economics and Ag Business

Growing up I always had a love for animals. In college I found my passion for agriculture. I have had the opportunity to work on UNL's cow/calf operation and for the beef ruminant nutrition lab. After graduation I hope to continue working in the beef industry and pursuing my love for agriculture.

John Ford Cairo, NE

Major: Animal Science- Food Animal Production and Management

I grew up on a family-owned feedlot and hay operation right south of Cairo. I have always had a passion for feeding cattle and providing a quality product to consumers. After I graduate, I plan on returning home to the family feedlot.

Makenna Dirkschneider West Point, NE

Major: Animal Science - Food Animal Production and Management

Minor: Krutsinger Nebraska Beef Industry Scholars, Ag business

I grew up being involved in 4-H and helping out on my family's feedlot operation. My passion for the beef industry took off from a very young age and has helped me pursue a degree in animal science. This summer I will be interning at the Gudmundsen Research Center in Whitman Nebraska, then planning on graduating this fall.

Eleanor Hlobik Prairie Village, KS

Major: Agribusiness **Minor:** Animal Science

I did not grow up on a farm but have been passionate about the agriculture industry my whole life. This past summer I interned on a small dairy operation in Bridgehampton, New York. After graduation I am moving to Pennsylvania to work at Cargill.

Ainsley Fischer Franktown, CO

Major: Animal Science- Food Animal Production and Management

I grew up in 4H where my love for the industry began. Once I started competing in livestock judging, my passion truly took off. I have had the opportunity to judge collegiately at NJC which led me to UNL where I just finished my livestock judging career in the fall.

Erika Cast Beaver Crossing, NE

Major: Animal Science- Food Animal Production and Management

Minor: Krutsinger Nebraska Beef Industry Scholars

I grew up on a small commercial cow calf and row crop operation in South Eastern Nebraska. I've had a love for the cattle industry for as long as I can remember. I plan on continuing and growing my passion for the industry in my job at the UNL Meat Animal Research Center in the Cow/Calf Division.

Trevor Ross Callaway, NE

Major: Animal Science- Food Animal Production and Management

Minor: Krutsinger Nebraska Beef Industry Scholars

I grew up on a cow calf and row crop operation about 10 miles west of Callaway. I have had a passion for cattle my entire life. I am returning home after graduation to continue my work as a 5th generation producer.

Emily Groeteke Cedar Rapids, NE

Major: Animal Science- Food Animal Production and Management

Minor: Krutsinger Nebraska Beef Industry Scholars

I grew up on a commercial cow-calf, row-crop, and feedlot operation all my life where I also showed cattle for ten years. My passion for the beef industry continues to grow and I am looking forward to being a part of it with my job at Cargill after school.

Reagan Meier Elm Creek, NE

Major: Agricultural Leadership

Minor: Animal Science

I grew up on a small farm and ranch operation south of Elm Creek. My love for the livestock industry got started with our cow-calf herd and grew through the years of 4-H and FFA. I continue to grow my love and passion for the livestock and agriculture industry during my time here at UNL.

Marissa Volcek Merkel, TX

Major: Agribusiness - Livestock Industries

Minor: Engler Agribusiness Entrepreneurship, Animal Science

I grew up on a row crop and small cow calf operation where I developed my

interest in agriculture, especially in the cattle industry. This summer I will be an intern for a feedlot in Kansas to further my education. After college, I will continue developing our cattle operation back home in Texas.

Katelyn Hoesche Crete, NE

Major: Animal Science- Pre Vet

I grew up on a small farm outside of Crete and was involved in 4-H and FFA. Cattle has always been my passion and hope to continue that by becoming a large animal veterinarian.

Casey Doernemann Dodge, NE

Major: Agricultural Economics

Minor: Agronomy and Animal Science

I grew up on a small family farm outside of Dodge Nebraska, where we raise row crops, fat cattle, outdoor hogs, poultry, and commercial cow/calf. For as long as I can remember, I have always had a passion for agriculture. After graduation, I plan working as a sales agronomist at Hefty Seed Company, while continuing to be involved on my family's farm.

Maddie Sonnenfeld Minden, NE

Major: Animal Science- Food Animal Production and Management

I grew up on a family farm close to Minden where we raise cow/calf pairs, row crops, and I have been showing cattle since I was 8 years old. I have always had a passion for agriculture especially the cattle side. This summer I am interning with Purina as a cattle feed sales rep where I will continue to gain knowledge and visit with other producers.

Kylie Dierks Hastings, NE

Major: Animal Science- Food Animal Production and Management

I grew up on a small acreage outside of Hastings, Nebraska where I found a love of animals and agriculture. I developed my passion for beef cattle while in college working in a variety of industry areas. After graduation, I want a job working within a beef reproduction system.

Grant Jones Stapleton, NE

Major: Animal Science- Food Animal Production and Management

Minor: Kruttsinger Nebraska Beef Industry Scholars and Engler Entrepreneurship

After college I plan on returning home to my families operation the Diamond Bar Ranch. We have black and red angus cattle that fit our cow calf operation well. Along side raising cattle we enjoy raising working ranch quarter horses. Im excited to go back and continue my career in the beef industry.

Brooke Ehlers Chambers, NE

Major: Animal Science- Food Animal Production and Management

Minor: Agribusiness

I grew up on a commercial cow/calf operation in Holt County, Nebraska, where I showed cattle in 4-H for 10+ years. From the time I was little, I was fascinated with cattle, and knew I wanted to stay in the beef industry. This summer, I am interning with Genex as an AI tech, and after graduation, hope to continue my career in the beef industry.

Abby Miller Mead, NE

Major: Animal Science- Food Animal Production and Management

Minor: Kruttsinger Beef Industry Scholars and Engler Entrepreneurship

I actually grew up in town but had the opportuntiy to show cattle, pigs, and start a small cow-calf herd with my Dad. I have a passion for cattle and people and will continue my work in facilitating leadership development in Aurora, NE while continuing my livestock photography service and tap truck rental business, Pat On Tap.

Kendal Neal Tyron, NE

Major: Animal Science- Business and Commujnication

Minor: Agribusiness and Grassland Systems

I grew up in the Sandhills, north of Tyron. My family has a cow-calf operation so I've worked cattle all my life and plan on conitnuing that after college returning home to my family ranch in May.

Kaleb Pofahl Neligh, NE

Major: Animal Science- Pre Vet

I grew up on my family's diversified ag operation where we raise row crops and have a cow-calf operation where we feed out all of our home-raised calves. I have been passionate about the agriculture industry for as long as I can remember. Upon graduation, I plan to attend the Nebraska/Iowa State veterinary school program with hopes to one day become a large animal veterinarian in northeastern Nebraska.

Sale

GENERAL INFORMATION

Herd Health

The UNL Beef Teaching Herd follows a careful vaccination program to ensure that the health of the cattle is excellent. All calves received vaccines for: IBR, PI3, BVD, BRSV, Pasteurella at branding along with a 7-way and then again at pre-conditioning. Health papers are not necessary for the shipment within the state of Nebraska. Arrangements will be made to accommodate any requirements for out-of-state travel.

Breeding Guarantee

Every effort has been made to ensure that the bulls offered for sale are fertile. All sale bulls have undergone and passed a Breeding Soundness Exam. All bulls selling will be 100% covered (less salvage value) if they are injured during their first breeding season and cannot return to service. Breeding season is defined as the 90-day period following the first turnout of the bulls. 100% of the value of the injured bull, minus salvage value, will be given as sale credit in the following year's sale or toward a replacement bull if one is available. All injured bulls must be diagnosed by a veterinarian. Please notify Dr. Matt Spangler as soon as an injury occurs. All claims must be made prior to September 15th, 2024.

Boarding

Bulls will be boarded free until May 13th, 2024, if the buyer so desires. After May 14th, the buyer will incur charges of \$5/day per bull for feed and labor.

Liability

UNL assumes no liability for personal injuries which may occur at this sale or as a result of inspecting these bulls prior to sale day.

Bull Management

These bulls in this sale were weaned and weighed on October 3rd, 2024. They were started on a high forage ration to prevent over-conditioning. This ration was 42.5% Corn Silage, 32.5% Sweet Bran, 10% modified distillers grains, 10% corn stalks and 5% supplement until April 12th. This ration was chosen to allow the bulls to express their potential genetics for growth. The bulls were fed as a simple group once a day in a four-acre trap which contained an open shed for wind protection. Ultrasound scans were taken on March 1st by Dr. Shawn Nicholson UGC Certified Technician, processed by the CUP Lab and complied by the Angus and Simmental Breed Associations. Final weights and hip heights were taken on March 1st. Scrotal circumference was taken on March 13th by Dr. Jay Wolverton during the Breeding Soundness Exams.

Genetics

EXPLANATION OF EPDS AND INDEXES

Expected Progeny Differences (EPD): a measure of the genetic merit of a bull for a given trait expressed in actual units. The Angus EPDs were calculated by the American Angus Association. The EPDs for the Husker Red and Black composite bulls were calculated by the American Simmental Association. EPDs in this catalog are current as of March 11th, 2024.

MX: Mixed Breeds	GV: Gelbvieh	HP: Hereford Polled	CS: Commercial Simmental

Husker Black Bulls have been DNA tested for coat color.

Homozygous Black: This bull WILL sire 100% black progeny when bred to black OR red cows.

Heterozygous Black: This bull carries the recessive red gene. When bred to homozygous black cows/heifers, the offspring will be 100% black. When bred to heterozygous black cows/heifers, 75% of offspring will be black and the other 25% will be red. When bred to red cows/heifers, the offspring will be 50% black and 50% red.

EPD INFORMATION

Performance EPDS

Calving Ease Direct (CED or CE): The Calving Ease EPD, both direct and maternal, are the economically relevant traits (ERT) as opposed to birth weight. This is a measure of the ease at which a bull's calves will be born. This EPD is reported as a percentage so that a higher value indicates a higher probability of unassisted calving.

Birth Weight (BW): Predicts the differences in calf weight at birth and is used as an indicator of the probability of dystocia (calving difficulty) when that calf is born.

Weaning Weight (WW): Measured in pounds of weaning weight and predicts differences in weaning weight. Because producers selling calves at weaning are usually paid solely by pounds of the calf, a higher value is more desirable. This EPD may be of little value for producers retaining ownership of calves beyond weaning, except for its correlated response to other growth traits, such as yearling weight.

Yearling Weight (YW): Measured in pounds of yearling weight and predicts differences in weight at one year of age. Typically, a larger value is better but caution should be used given its correlation with mature cow weight.

Maternal EPDS:

Calving Ease Maternal (MCE or CEM): This is an ERT for unassisted calving. Contrary to Calving Ease Direct EPD, however, the Calving Ease Maternal EPD predicts the probability of a bull's daughter calving without assistance. This EPD is also expressed in terms of percentages with a higher value indicating that the bull's daughters are more likely to deliver a calf unassisted.

Milk (MILK): Is the maternal portion of weaning weight which is mainly assumed to be due to the milk production of the dam. The Milk EPD is reported in pounds of weaning weight. In areas where feed resources are abundant, selection for increased Milk EPD may not be a problem, except that it reduces the number of cows that can be maintained on a feed resource. This is because a high milking female will require more feed energy for lactation and have less energy available to put on the condition necessary to rebreed. In scenarios with limited feed resources, selection for low Milk EPD is probably warranted. This EPD is of no use in terminal mating systems in which heifer replacements are not retained.

Docility (DOC): A difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

Stayability (STAY): An indicator of longevity of a bull's daughters in the cow herd. This EPD predicts the probability that a bull's daughters will remain in the herd throughout advanced ages. Because this EPD is used to predict the longevity of a bull's daughters, it is of no use if replacements are not going to be retained.

Heifer Pregnancy (HP): A selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

EPD INFORMATION

Carcass EPDs:

Carcass Weight (CW): A predictor of the differences in hot carcass weight of a sire's progeny compared to the progeny of other sires at an age constant endpoint.

Marbling (MARB): The marbling EPD indicates the marbling of the ribeye of a bull's Progeny.

Ribeye Area (REA): Ribeye Area EPD are reported in square inches and indicate the area of the longissimus muscle between the 12th and 13th ribs of a bull's offspring.

Yield (YIELD): a measure of the relative proportion of closely trimmed, boneless retail cuts from the bull's progeny. Higher EPDs mean higher yield grades, and thus a lower proportion of retail cuts.

\$ Indexes:

All Purpose Index (API): Expressed in dollars per cow exposed under an all-purpose-sire scenario. Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Expressed in dollars per cow exposed under a terminal-sire scenario. Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield. Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI.

Maternal Weaned Calf Value (\$M): Expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves.

Beef Value (\$B): A terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for post weaning and carcass traits.

Austin and Dale

Although the senior Bull Sale class puts the sale together, Austin and Dale are truly the ones that make it happen managing the bulls from the day they were conceived.
